

IT'S UP, it's down. CAG-2 men (l. to r.) William J. Waite, AD2, Robert D. Speight, AOC and John G. Smithers, AT1 stand in front of the availability board and seem pleased that another Corsair is in good repair.

FINDING trouble spot in wing of Panther-jet, CAG-2 maintenance officer, Lcdr. George C. VanMater, points out same to Chief Aviation Metalsmith Elmer Thompson.

PLEASED at what he hears, CAG-2 doctor, Lt. James E. Shropshire Jr., lets the stethoscope continue its quiz while Lcdr. Ralph E. Barclay's anatomy answers. On hand to record is Herbert J. Norman, HMC.
